## We pride ourselves to beat our competitors in:

✦✦ 100% satisfied students over past 4 years. We are the only institute to have such results in Singapore. We put in a lot of hard work and long hours of discussions with our students to achieve this.

✦✦ Our courses are taught with a job-oriented approach with 95% hands on, we don't teach bookish knowledge. This means our exercises are geared towards what is required on the job.

✦✦ Apart from the classrooms, we give 100+ exercises in each course for students to do independently so that their skill in the subject is fostered.

✦✦ We are the only training institute providing FREE after training support. We work with our students after they finish the course and once they are on the job, so that if they are stuck on the job, they are not left alone, they can contact our trainer and get their knowledge updated.

✦✦ We offer huge discounts on followup or advanced courses, to make sure students can excel in a given subject by continuing education in advanced level in the same subject and it doesn't hit their pocket hard.

✦✦ We have the most economical pricing in town.

✦✦ We have the friendliest environment in classroom. Our students love us for that.

✦✦ We are the only institute who show our X students feedback proudly to our new students, since our X students are so happy with our quality, they refer their friends to us.

✦✦ We are the only institute offering revision classes for students who learn a course but don't get a chance to practice for 6 months and need to re-learn the same course.

✦✦ We offer special classes for certification preparation for those who need to get certified to take their career to the next level.

✦✦ We are the only institute going beyond training, we prepare our candidates for job interviews.

✦✦ We are the only institute offering FREE "Career Counseling". If you have friends who don't know how to enter IT, what should they learn, what career should they take, send them to us for a FREE counseling session and we will guide them towards the 'right path' absolutely FREE of any obligation. They have no obligation to learn with us or pay anything for this session, it's 100% FREE. This is our way of contributing to the community and our students' careers.

✦✦ We pride ourselves in being the only institute to offer very flexible ways to pay course fees.

✦✦ We go way beyond the classroom to work with our students. We offer commercial projects to our students as and when we get them from our clients and pay our students to do these projects. We don't give our projects to any outside company.
